SUMMARY

Backend-Focused Software Engineer with expertise in designing and building reliable, scalable backend and server-side solutions. Skilled in NodeJS, Python, and REST API development with experience across backend frameworks and database technologies. Strong foundation in software engineering, problem-solving, research, and collaborative development. Interested in integrating AI and emerging technologies into backend applications where they provide practical value.

TECHNICAL SKILLS

Programming Languages: Python, Javascript, Typescript, C#, SQL

Backend and Data: NodeJS, NestJS, FastAPI, ASP.NET Core, REST APIs, PostgreSQL, TypeORM

AI & Tools: OpenAI, Gemini, RAG, Vector Databases, LangChain, Git/Github, Docker, Linux

EXPERIENCE

AI Research Intern

Prince Sattam bin Abdulaziz University

Aug 2026
Riyadh, KSA

- Researched AI model deployment on resource-constrained edge devices
- Optimized and deployed Computer Vision models for real-time drone detection
- Evaluated inference performance across Raspberry Pi and embedded devices

Backend Developer

CodeBryx

Jan 2024 – Oct 2025
Lahore, PAK

- Developed backend services and REST APIs for production applications
- Built booking, scheduling, payment, and multi-tenant business workflows
- Developed configurable AI chatbot backends for multiple product use cases

PROJECTS

Multi-Tenant Service Management Platform

Backend Development Project

Jan 2024 – Oct 2025
NestJS, PostgreSQL, TypeORM

- Built backend services for a multi-tenant appointment management platform
- Developed booking, scheduling, calendar, and payment workflows
- Implemented APIs for service providers, customers, and lead management

Configurable AI Chatbot Platform

Backend & AI Integration Project

Mar 2025 – Oct 2025
FastAPI, RAG, Vector Databases, LangChain

- Developed AI chatbots for multiple use cases and product ideas
- Built a configurable chatbot architecture adaptable to different domains
- Designed reusable components for rapid use-case customization

EDUCATION

University Of The Punjab, Lahore

B.S. in Software Engineering — CGPA: 3.85/4.00

Lahore, PAK
Sep 2023 – June 2027

CERTIFICATIONS

- Introduction to Databases for Back-End Development - Meta
- JavaScript Algorithms and Data Structures — freeCodeCamp
- Google AI Essentials — Google
